The appliance must be installed into cabinetry and be supported from underneath. The air intake opening at the bottom of the door must be left unobstructed. For a flush mount installation the surrounding cabinets doors should have the same thickness as the oven control panel (13/16" for all PRO models). For installation of the oven in column please refer to the drawings view of model MO 30 STANE. For under counter installation refer to the cooktop or rangetop installation drawing in the specific sections of this document.
