CRAFTED WITH YOU IN MIND

Designed and manufactured in the United States. a Capital appliance is created with the customer's best interest at heart from beginning to end. The first engineers to design high end barbecues and commercial performance ranges for home use are among our leadership, and we continue to redefine the standards of the industry we set the foundation for. At Capital, we refuse to follow the pack, choosing instead to improve on our own concepts and designs as we move forward. Our customers have high expectations for the equipment they use to create superb dishes in the comfort of their homes. We meet these standards by delivering a first-rate appliance with value that goes beyond the product itself. Whether you're in the kitchen or grilling outdoors, a Capital appliance is more than just a tool – its brilliant performance takes the task of cooking and turns it into an enjoyable experience.

OUR BURNERS

Your favorite ice cream flavor is a personal preference and so is your burner style. That's why we give you two distinct approaches – the open "restaurant style" flame and the high performance sealed burner option.

The open burner packs 25,000 BTU's in each burner via 94 distinct heat sources for the most even heat distribution. Built for efficiency, our Power-Flo™ sealed burners are the highest input sealed burners on the market today.

FIT & FINISH

Our product is our best spokesperson.
Run your hand along the seams, turn the knobs and open the oven doors. Each seam is TIG welded, re-grained and polished by hand for a smooth, impeccable finish.
Our Open burners have a cast iron base with a matte porcelain finish and an aluminum cap made of high temperature die cast for optimal performance and cleanability.
Our durable, heavy duty knobs are designed to Stay-Cool. Our drip trays are sturdy, removable and slide easily into place.
Features such as the griddle plate and grill integrate beautifully with a sleek cover when not in use. Feel and see the difference.

DIFFERENCE

Over 50 years of engineering excellence behind the Capital Cooking brand has taught us a few things. We pay attention to details – small and large – make your cooking experience gratifying and the aesthetics enviable. Here are a few of the details that set us apart.

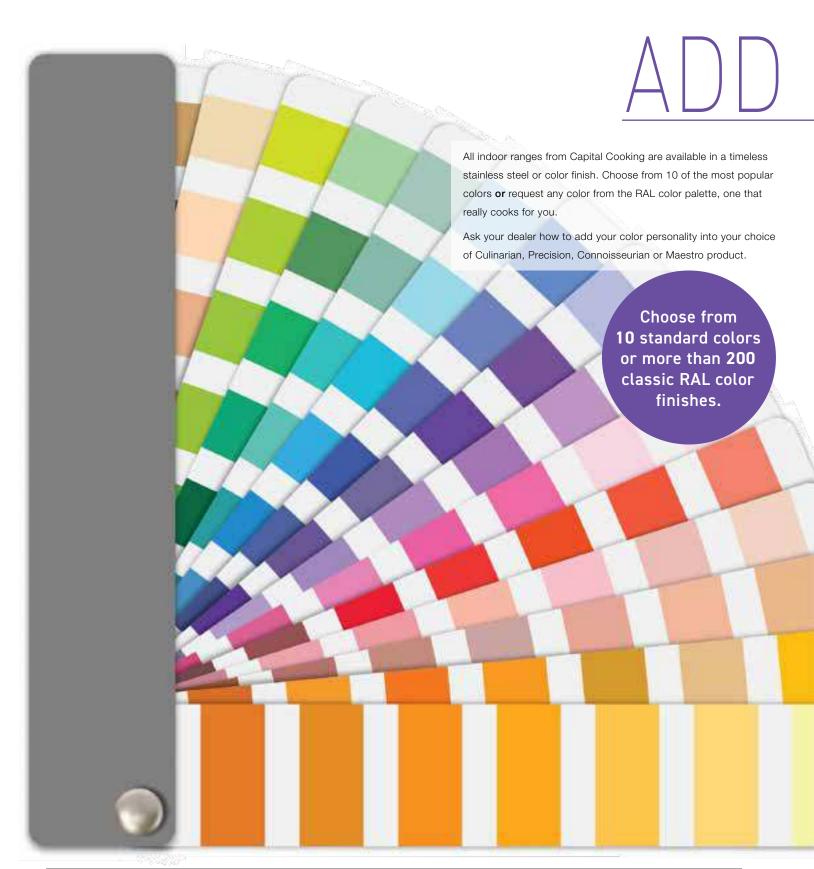

MOIST COOK

Our Maestro ovens and Connoisseurian Series primary ovens have an exclusive Moist Cook cooking feature that uses moisture, not steam to keep flavors in your food. The concept is clean and simple. A small water reservoir creates the perfect level of humidity, slowing evaporation to ensure that even "over cooked" foods are moist and juicy. Moisture in the oven also reduces the popping and splattering of grease when cooking and keeps the oven up to 90% cleaner, but still provides that crispy carmelized finish you love.

MOTO-ROTIS™

The Capital motorized rotisserie feature is easy to assemble and quick to switch from the baking trays into professional-quality rotisserie system. Experience the juiciest meats possible with crispy golden skin compliments of the constant movement and even heat distribution. Sturdy cast stainless steel construction will hold multiple birds and the largest roasts.
